COVER

Three stories in this issue (pages 14 through 23) relate to the Army's palletized loading system (PLS). The cover design depicts the PLS progression from a concept to reality. The Army, which had been looking for a better load-handling and transporting system, selected the PLS as a nondevelopmental item in 1990. The 1st Cavalry Division at Fort Hood, Texas, became the first unit equipped with the PLS in February of 1994. The PLS provides today's Army with a modern, fast, tactical vehicle for load-handling and re-supply missions.

This medium is approved for the official dissemination of material designed to keep individuals within the Army knowledgeable of current and emerging developments within their areas of expertise for the purpose of enhancing their professional development.
